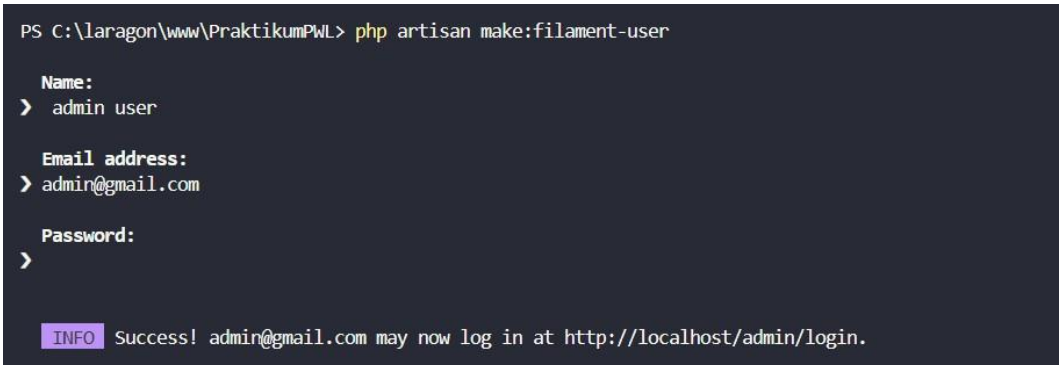
Langkah 4 – Membuat User Admin

Langkah	Jawaban/Deskripsi
1	**Isi data:**

Langkah 5 – Menjalankan Aplikasi

Langkah	Jawaban/Deskripsi
1	**Php artisan serve** Analisis & Diskusi	
1	**Apa kelebihan Filament dibanding membuat admin panel manual?** Sangat cepat (tinggal pakai komponen), tampilan profesional secara otomatis, dan fitur lengkap (CRUD, tabel, form) tanpa perlu coding HTML dari nol.
2	**Mengapa Filament menggunakan Livewire?** Agar dashboard terasa interaktif (seperti aplikasi modern) tanpa perlu menulis banyak kode JavaScript/AJAX manual.
3	**Apa perbedaan SQLite dan MySQL dalam development?**

	SQLite adalah file tunggal (praktis untuk belajar/lokal), sedangkan MySQL adalah sistem server (lebih kuat untuk aplikasi skala besar).
4	**Apa fungsi Panel Builder?** Menyediakan kerangka kerja (UI/UX) lengkap untuk membuat halaman admin dalam hitungan menit.

Langkah 3 – Install Filament v4

{
    public static function configure(Schema $schema): Schema
    {
        return $schema
            ->components([
                TextInput::make('name')
                    ->required()
                    ->maxLength(255),
                TextInput::make('email')
                    ->email()
                    ->required()
                    ->maxLength(255),
                TextInput::make('password')
